EDUCATION

California Polytechnic State University

San Luis Obispo, CA

Bachelor of Science in Computer Science — GPA: 3.8

June 2026

- Relevant Coursework: Operating Systems; Artificial Intelligence; Theory of Computation; Distributed Systems, Networks and Parallel Computing; Databases; Programming Languages; Algorithms; Data Structures; OOP

SKILLS

Languages: JavaScript, TypeScript, Python, Java, C, SQL, HTML/CSS, RISC-V Assembly, Racket, Golang

Libraries/Frameworks: React, Node.js, Electron.js, Express.js, Next.js, Angular, Spring, Unsloth, Tensorflow

Databases: MySQL, PostgreSQL, MongoDB, Prisma

DevOps: Docker, K8s, AWS, Nginx, Web Sockets

Tools & Others: Git, Postman, SPHERE Research Infrastructure, REST API

EXPERIENCE

SPHERE Software Engineer Intern

June. 2025 – Present

USC ISI SPHERE

Marina Del Ray, CA

- Modernized the Distributed Experiments Workflow (DEW) portal by migrating authentication to SPHERE's internal account system, refactoring the Angular + TypeScript frontend, and containerizing the Flask backend with Docker to ensure stable API operations and full-stack reliability
- Integrated the DEW portal with the SPHERE Research Infrastructure, centralizing experiment creation, reservations, and XDC management into a unified platform to improve research data traceability for researchers
- Developed a full-stack reservation and heatmap system with React, PatternFly, and TypeScript, saving teams 10+ hours of manual scheduling per week and supporting 200+ monthly reservations

Software Engineer Intern (Project Leader)

Jan 2026 – May 2026

Zoetic Motion

San Luis Obispo, CA

- Led the implementation of an internal CRM and outreach web app, modeling schools, teams, contacts, and outreach pipelines to support early go-to-market workflows across 100+ schools
- Directed development of a Claude-based internal automation agent, architecting RAG infrastructure with Supabase vector search, company-specific knowledge ingestion, and contextual prompt orchestration to automate prospecting, outreach generation, and market research workflows

Full-stack Software Engineer Intern

June 2024 – May. 2025

4yourbusiness INC.

Pleasanton, CA

- Engineered the company's primary marketing website using Next.js, React, TypeScript, and Tailwind CSS, implementing responsive UI design and integrated email workflows to improve customer engagement
- Deployed a scalable inventory management platform with React, Electron, and MySQL that automated product data updates, eliminating manual processes and saving staff 2+ hours per day
- Updated inventory infrastructure by transferring 10,000+ product records from Microsoft Access to MySQL, employing validation and de-duplication strategies to strengthen data accuracy and long-term scalability

PROJECTS

Tinvest

Sep. 2025 - Present

Stock/Crypto Market News and Trading App

San Luis Obispo, CA

- Built a full-stack Stock/Crypto management app using React 18 + TypeScript and Node.js/Express, enabling secure portfolio tracking and interactive market data visualization
- Leveraged Tinvest to systematically track trades, evaluate risk exposure, and refine strategy, contributing to approximately 1000% portfolio growth from 2024 to 2025 through disciplined, data-driven investment decisions

HorseGPT

Feb. 2025 – June 2025

AI Horse Race Predictor

San Luis Obispo, CA

- Trained a Gemma 3 model with LoRA fine-tuning on 200,000+ horse races (1990–2020) using Torch, Unsloth, and Pandas, reaching 60% prediction accuracy which outperforms baseline guessing rates
- Leveraged Cal Poly's Unix server GPUs to train and run our LLMs in GGUF format, cutting training time by 40% and reducing inference latency to sub-second prompt responses
